(with Backup and Restore)

EmpoweringEngineers.uk

Free, privacy-focused AI tools to accelerate your journey to CEng, IEng, and EngTech Professional Registration through the Engineering Council.

VIEW USER MANUAL & SOP

● VIEW: DEFAULT DARK

APPLICATION ARCHITECT

The all-in-one workspace. Draft, audit, and export your entire CEng or IEng application with real-time scoring.

CPD SMART-PLANNER

Audit your skills against UK-SPEC A-E and build a strategic 70/20/10 Development Action Plan.

RACI MATRIX

Define clear team roles (Responsible, Accountable, Consulted, Informed) for complex engineering projects.

STAR ENGINE

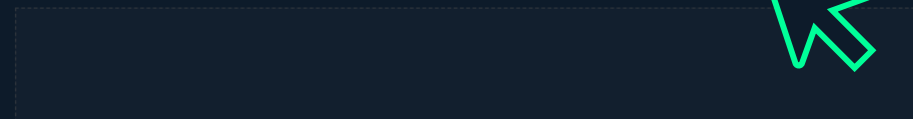

Structure your competency evidence using the Situation-Task-Action-Result format.

ETHICS COMPASS

Navigate ethical dilemmas using RAEng principles and generate conflict resolution scripts.

MANAGEMENT COACH

Apply strategic frameworks (SWOT, PESTLE, GROW) to demonstrate leadership competence.

PROFESSIONAL REGISTRATION WORKBENCH

The all-in-one workspace for drafting, auditing, and exporting your CEng, IEng, or EngTech application. Features real-time UK-SPEC scoring and vocabulary coaching.

>> KEY FEATURES

- Competence Logic (L1-L4):** The tool analyzes your text density and verb strength to estimate your UK-SPEC score (Level 1 'Aware' to Level 4 'Expert'). Target Level 3+ for CEng.
- The STAR Method:** Use the built-in tabs to structure evidence: **S**ituation (Context), **T**ask (Problem), **A**ction (Your Contribution), **R**esult (Outcome).
- Ghost Text Engine:** Stuck? The tool provides context-aware examples for Civil, Mech, and Electrical scenarios to overcome 'Blank Page Syndrome'.

🔒 **PRIVACY:** Your drafts are saved to your browser. Clearing cache will remove them.

>> HOW TO USE

- 1. Select Role:** Choose your target (CEng/IEng) to load the specific UK-SPEC competence framework (A-E).
- 2. Draft Career Summary:** Use the 'Roles 1-3' tabs to map your last 5 years of employment history.
- 3. Build Competencies:** For each section (A1, A2, etc.), use the STAR builder. The tool will compile your inputs into a coherent narrative.
- 4. Export:** Generate a formatted .DOCX file ready for mentor review.

ROLE 2: PREVIOUS

ROLE 3: PREVIOUS

ROLE 3 DETAILS

COMPANY NAME

Junior & Sons Fabrication

JOB TITLE

Graduate Engineer

START DATE

Sep 2017

FINISH DATE

Feb 2019

RESPONSIBILITIES

Rotational graduate scheme. Spent 6 months in Design, Manufacturing, and Quality Assurance.

ACHIEVEMENTS

- Created a new tracking spreadsheet for scrap reduction.
- Assisted in the commissioning of the new CNC lathe.

AUTHORITY & AUTONOMY

No financial authority. Work checked by Line Manager.

>> THE COACH

COMPETENCE CHECK

Level 1 - Aware

Performs the activity with significant supervision and guidance. Performs basic routine and predictable tasks. Little or no individual responsibility. This level of competence would not be sufficient for election to membership.

COMPETENCE A

Chartered Engineers shall use a combination of general and specialist engineering knowledge and understanding to optimise the application of advanced and complex systems. This competence is about the ability to understand underpinning technical principles relevant to the applicant's area of practice and applying them to develop technical solutions.

A1: Requirements

Have maintained and extended a sound theoretical approach to enable them to develop their particular role

- Formal training related to your role
- Learning and developing new engineering knowledge in a different industry or role
- Understanding the current and emerging technology and technical best practice in your area of expertise
- Developing a broader and deeper knowledge base through research and experimentation
- Learning and developing new engineering theories and techniques in the workplace

COMPETENCE A

Chartered Engineers shall use a combination of general and specialist engineering knowledge and understanding to optimise the application of advanced and complex systems. This competence is about the ability to understand underpinning technical principles relevant to the applicant's area of practice and applying them to develop technical solutions.

A1: Requirements

Have maintained and extended a sound theoretical approach to enable them to develop their particular role

- Formal training related to your role
- Learning and developing new engineering knowledge in a different industry or role
- Understanding the current and emerging technology and technical best practice in your area of expertise
- Developing a broader and deeper knowledge base through research and experimentation
- Learning and developing new engineering theories and techniques in the workplace

Power Verbs:

PROFESSIONAL REGISTRATION WORKBENCH

The all-in-one workspace for drafting, auditing, and exporting your CEng, IEng, or EngTech application. Features real-time UK-SPEC scoring and vocabulary coaching.

>> KEY FEATURES

- Competence Logic (L1-L4):** The tool analyzes your text density and verb strength to estimate your UK-SPEC score (Level 1 'Aware' to Level 4 'Expert'). Target Level 3+ for CEng.
- The STAR Method:** Use the built-in tabs to structure evidence: **S**ituation (Context), **T**ask (Problem), **A**ction (Your Contribution), **R**esult (Outcome).
- Ghost Text Engine:** Stuck? The tool provides context-aware examples for Civil, Mech, and Electrical scenarios to overcome 'Blank Page Syndrome'.

🔒  **PRIVACY:** Your drafts are saved to your browser. Clearing cache will remove them.

>> HOW TO USE

- 1. Select Role:** Choose your target (CEng/IEng) to load the specific UK-SPEC competence framework (A-E).
- 2. Draft Career Summary:** Use the 'Roles 1-3' tabs to map your last 5 years of employment history.
- 3. Build Competencies:** For each section (A1, A2, etc.), use the STAR builder. The tool will compile your inputs into a coherent narrative.
- 4. Export:** Generate a formatted .DOCX file ready for mentor review.
